Chief, PT/PC

28 April 1952

Special Contracting Officer

Contracts with Foreign Nationals Receiving Stateside Training.

1. It has come to the attention of this office that a considerable number of agents of foreign nationality are receiving training at installations in the United States. Very few of these individuals have been put under contract by this office and even fewer field contracts have been submitted for review and for formal Agency recordation.

2. We cannot over-emphasize the importance of having considered, written contracts with each and everyone of these individuals. The very nature of the training presently being given and the apparent future use of these agents makes injuries and resultant financial obligations on the part of the Government highly probable. It is hoped that the Government's obligations can be limited to the Contractual terms.

3. It is requested that your office check the appropriate divisions to ascertain the nature and terms of the Agency's relationship with these people. Consideration should be given as to what obligations the Agency will be liable for and appropriate contracts reflecting that determination should be drawn by this Unit.
